Table 2: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F1.

Table 3: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F2.

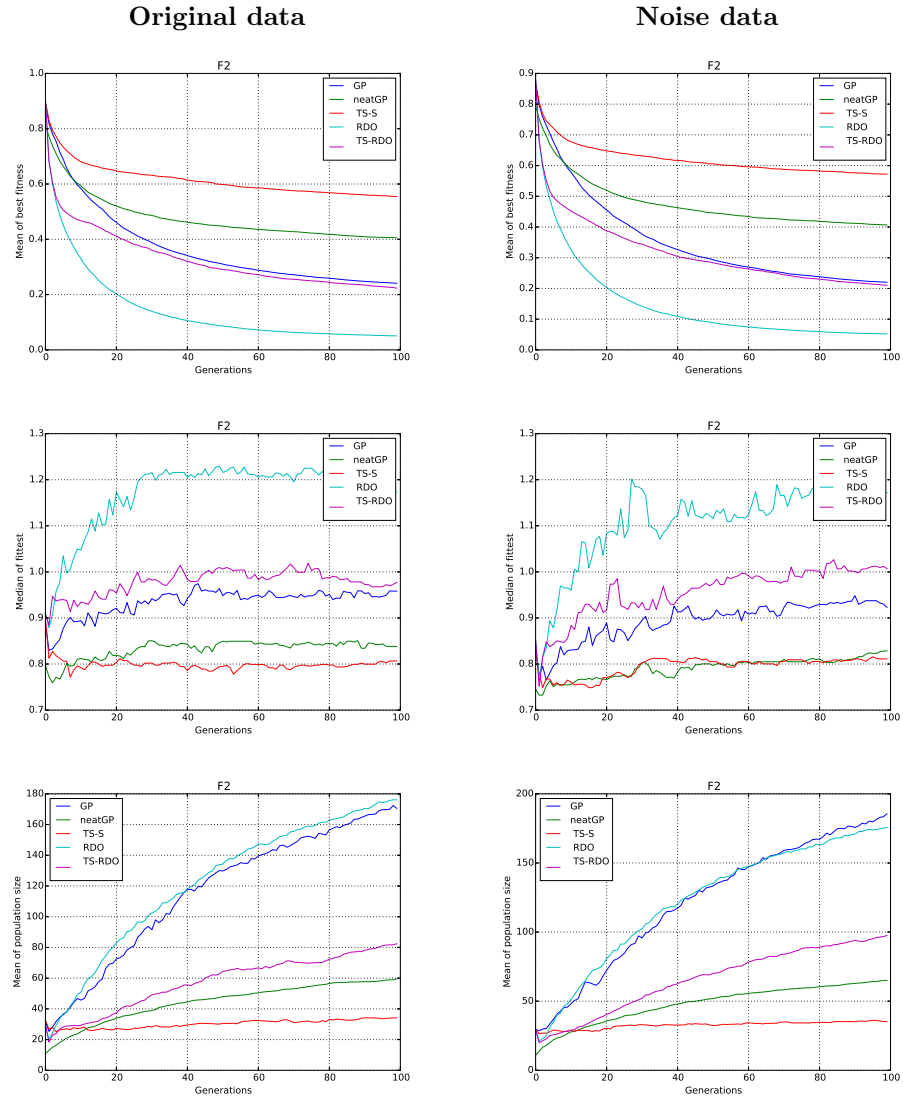

Table 4: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F3.

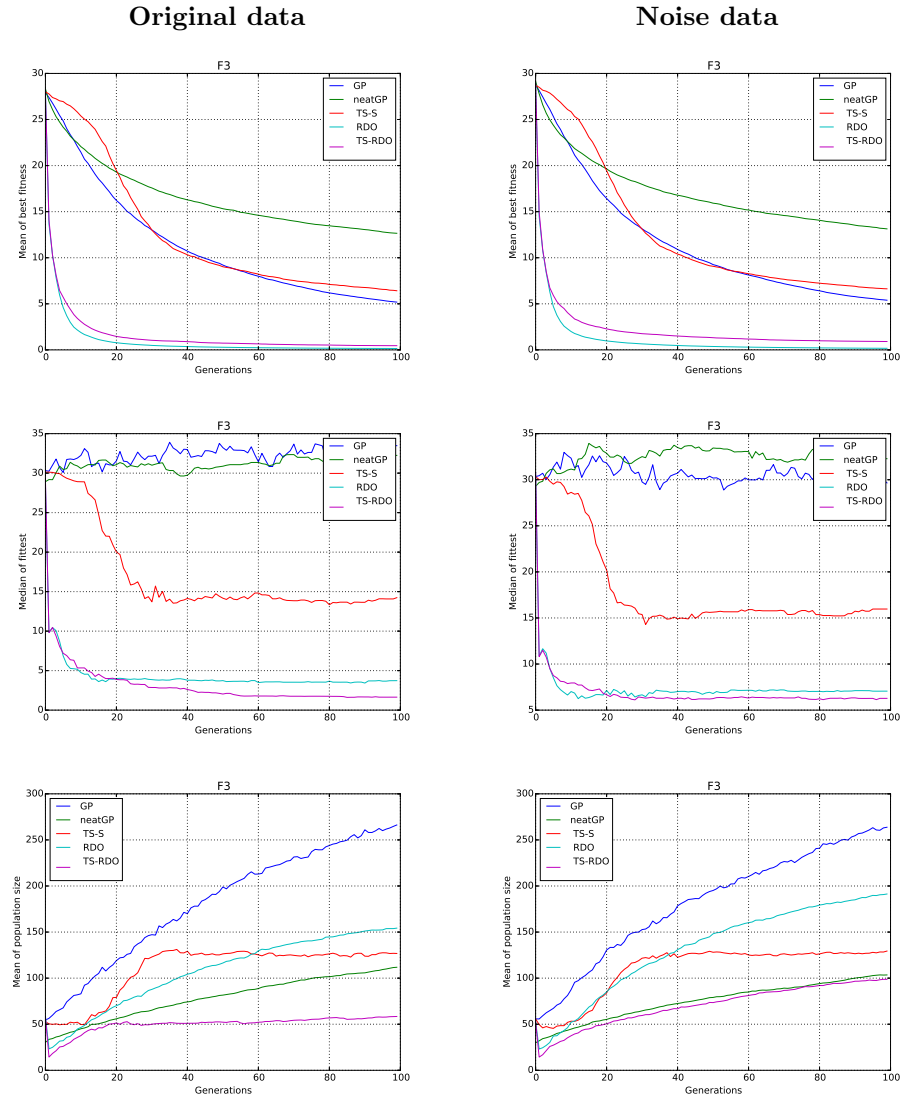

Table 5: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F4.

Table 6: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F5.

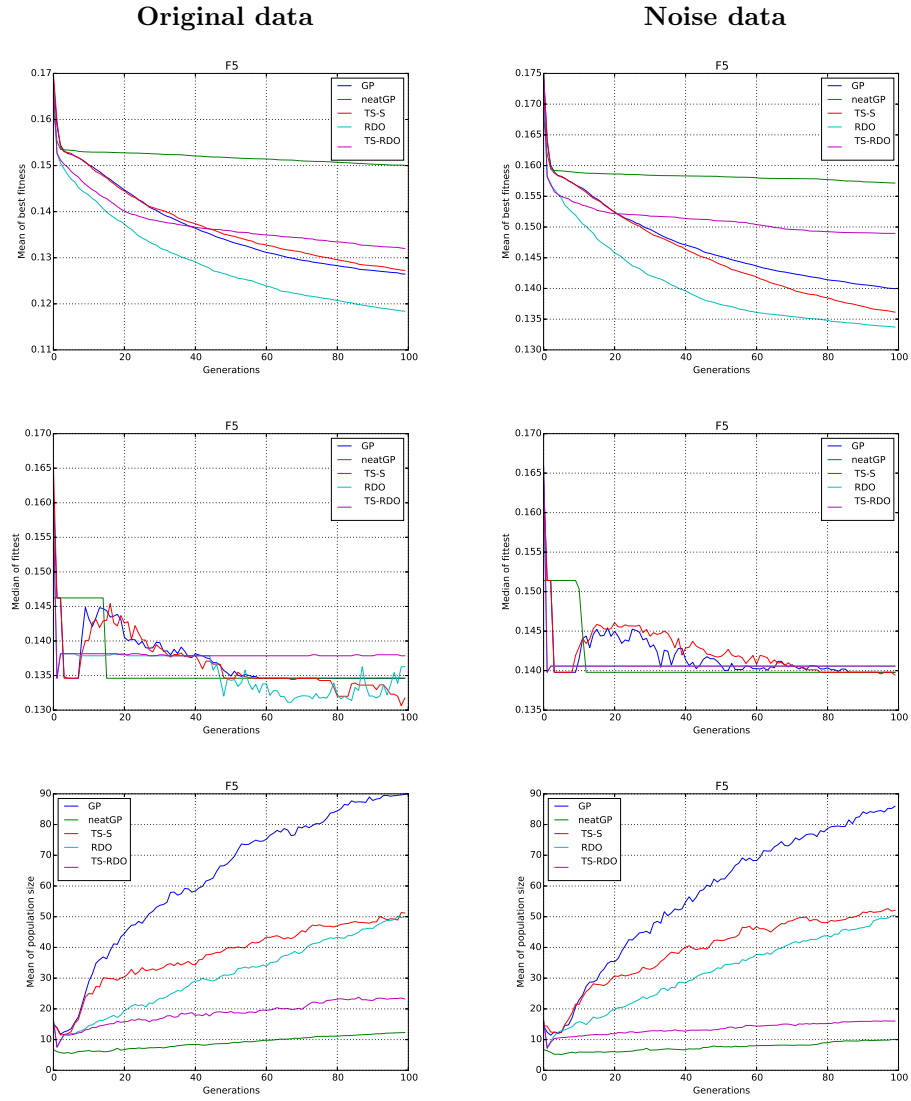

Table 7: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F6.

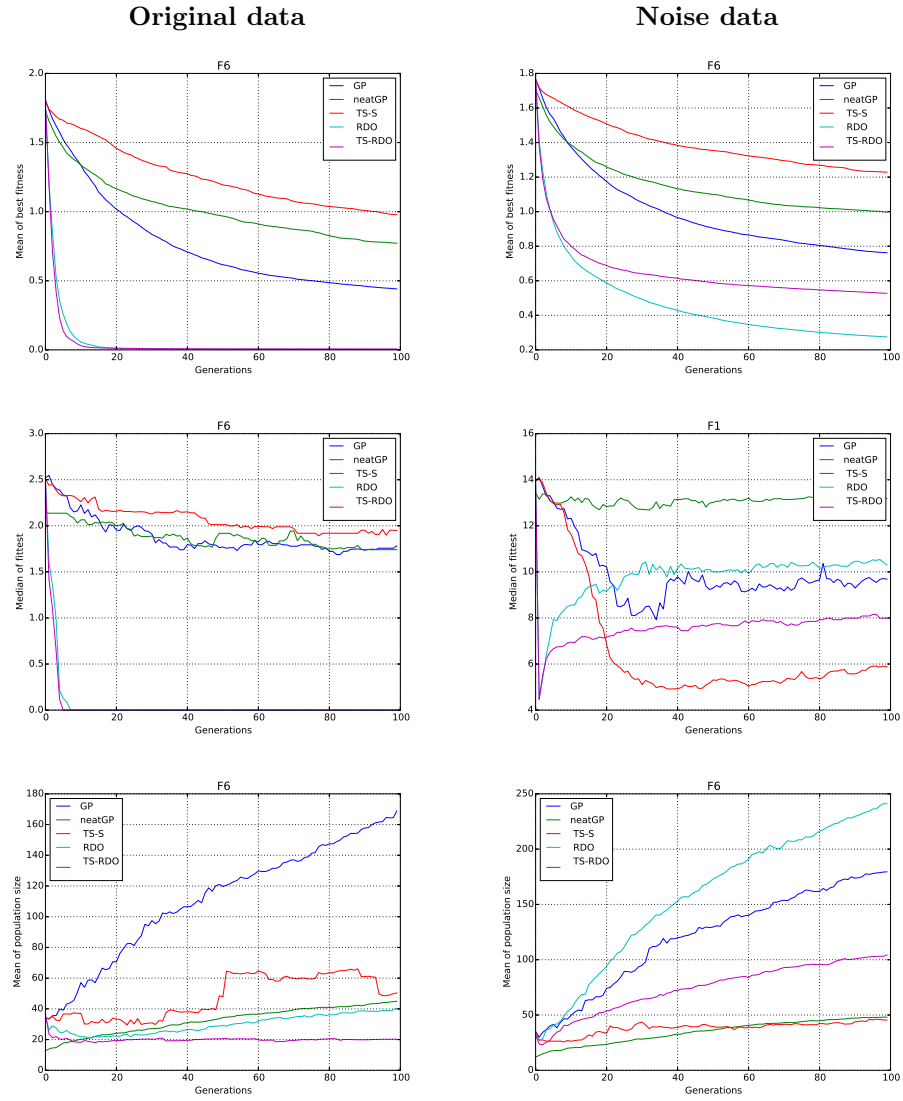

Table 8: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F7.

Table 9: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F8.

Table 10: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F9.

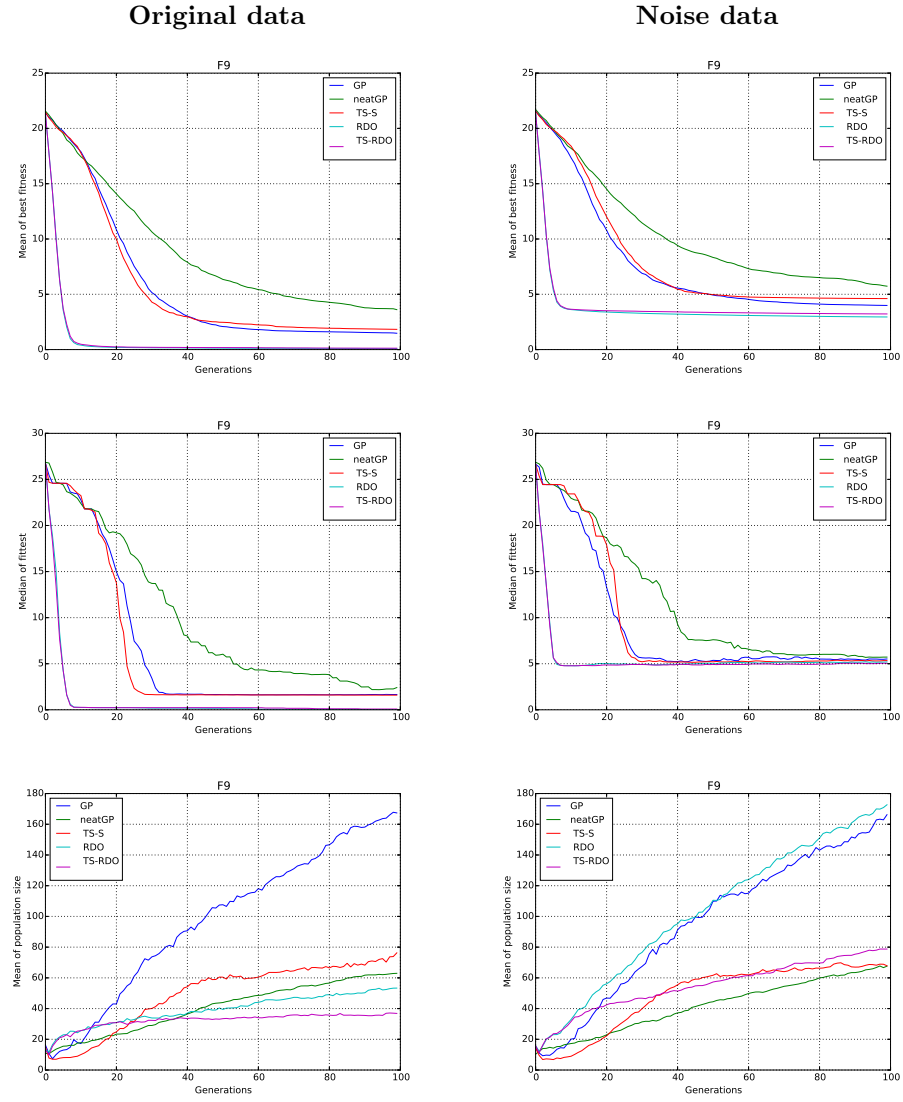

Table 11: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F10.

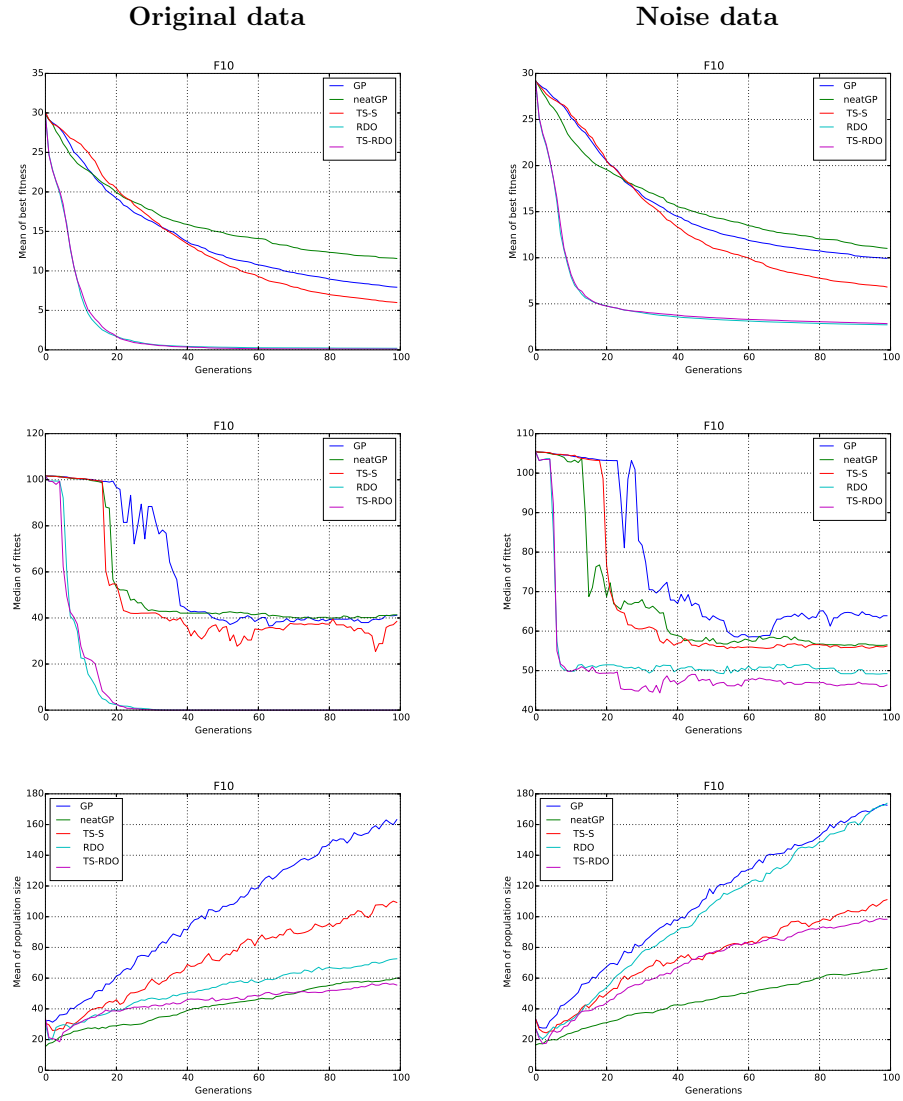

Table 12: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F11.

Table 13: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F12.

Table 14: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F13.

Table 15: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F14.

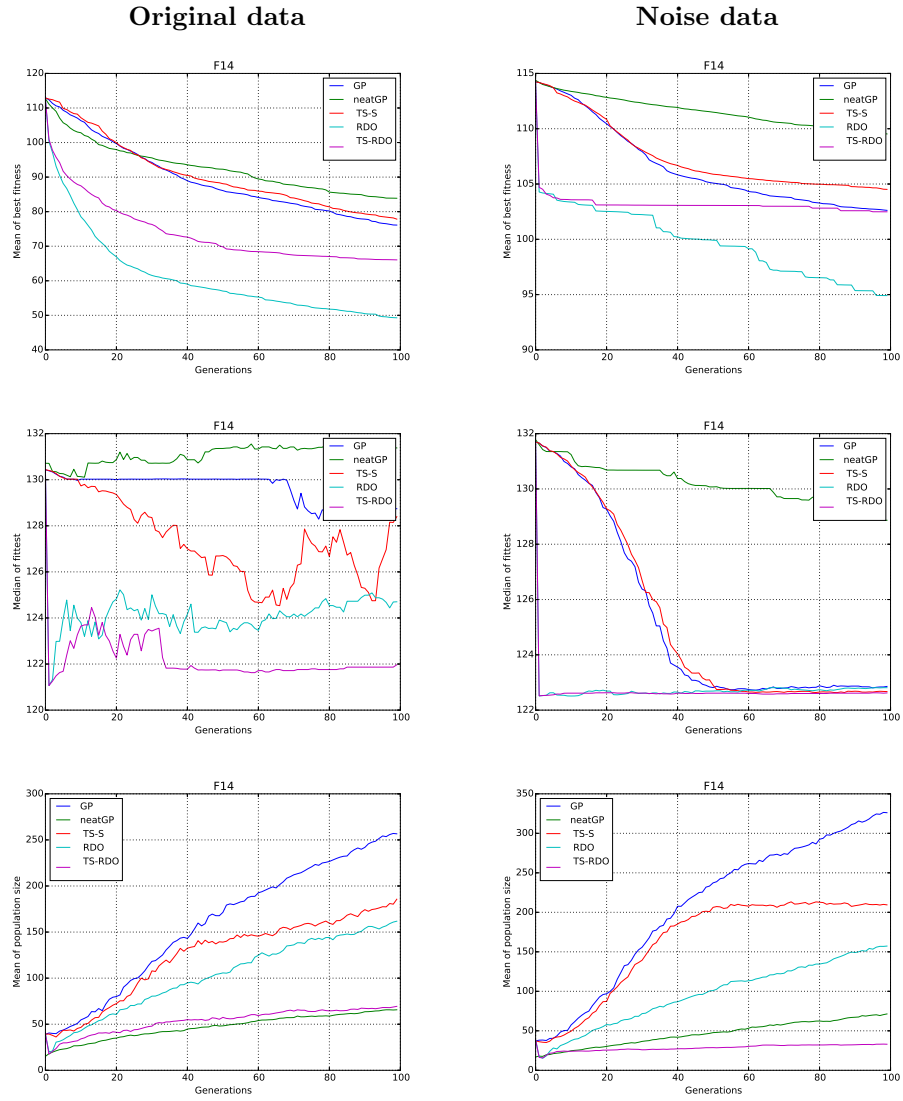

Table 16: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F15.

Table 17: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F16.

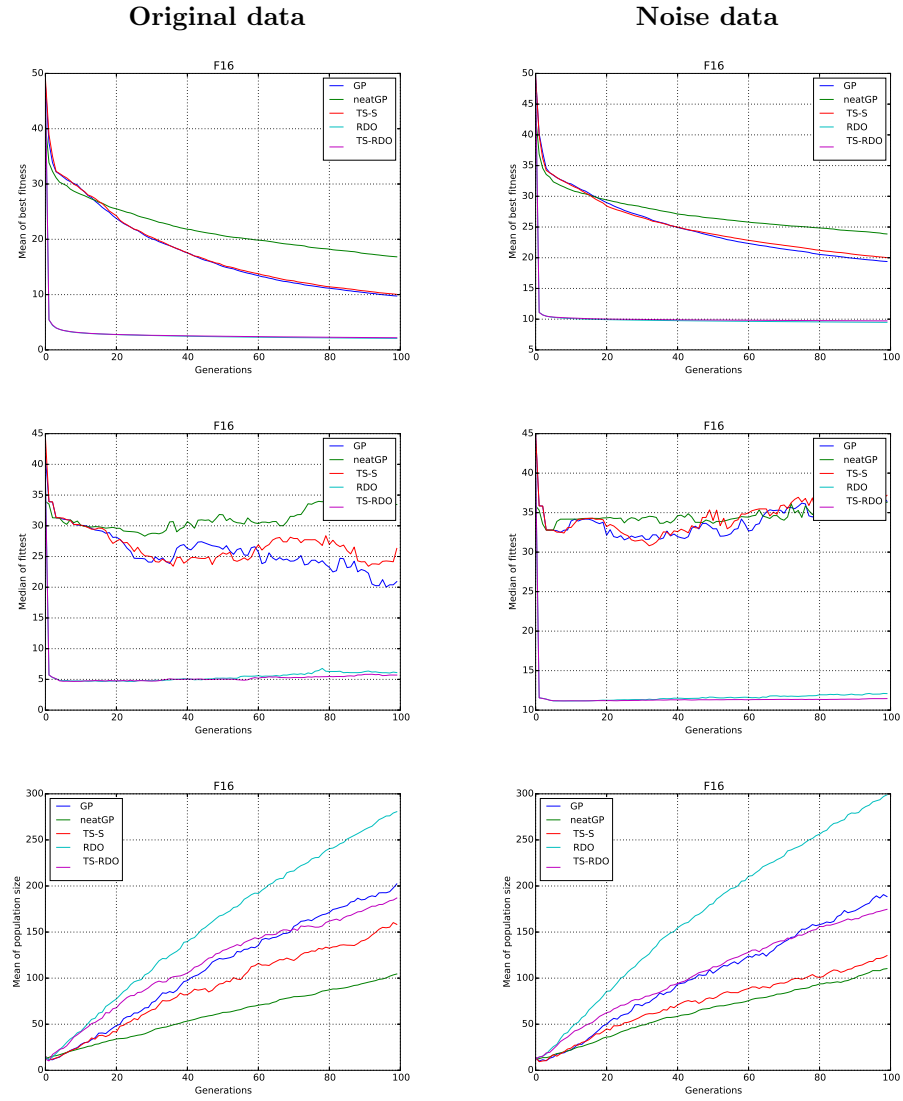

Table 18: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F17.

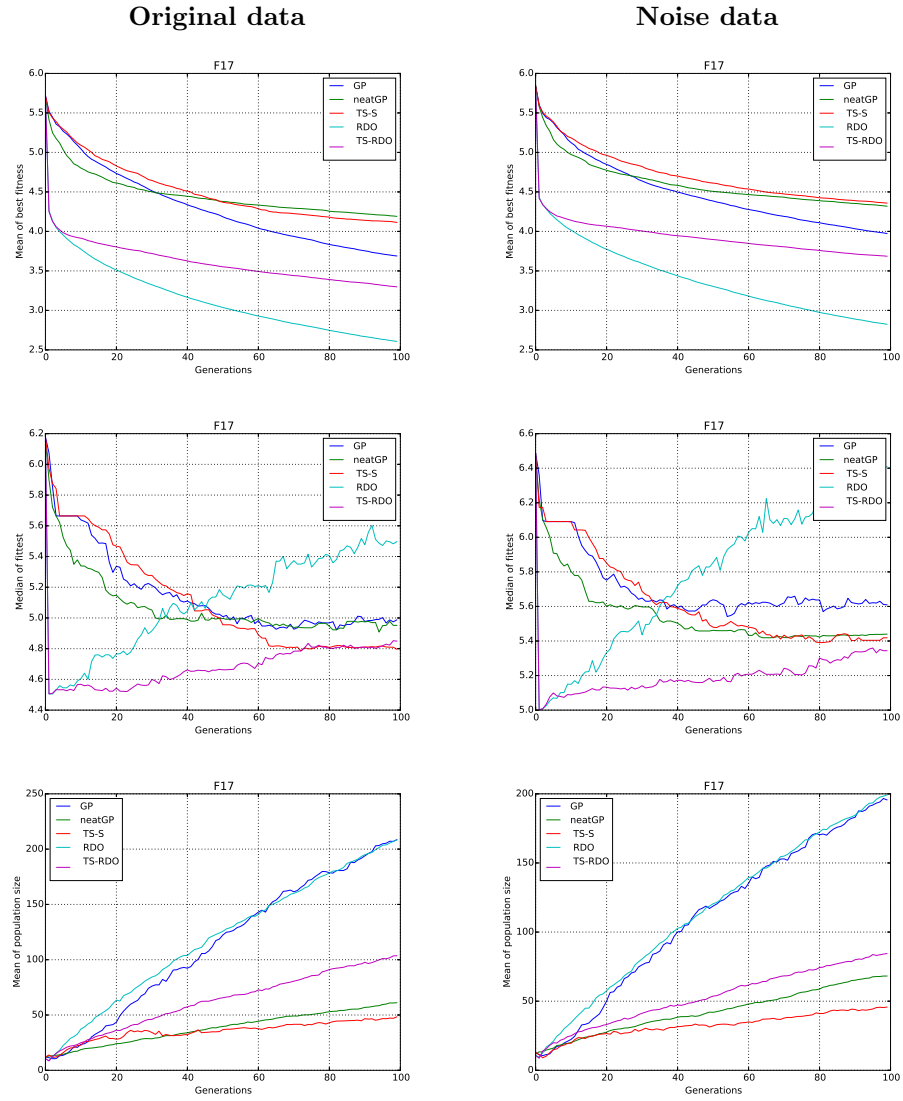

Table 19: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F18.

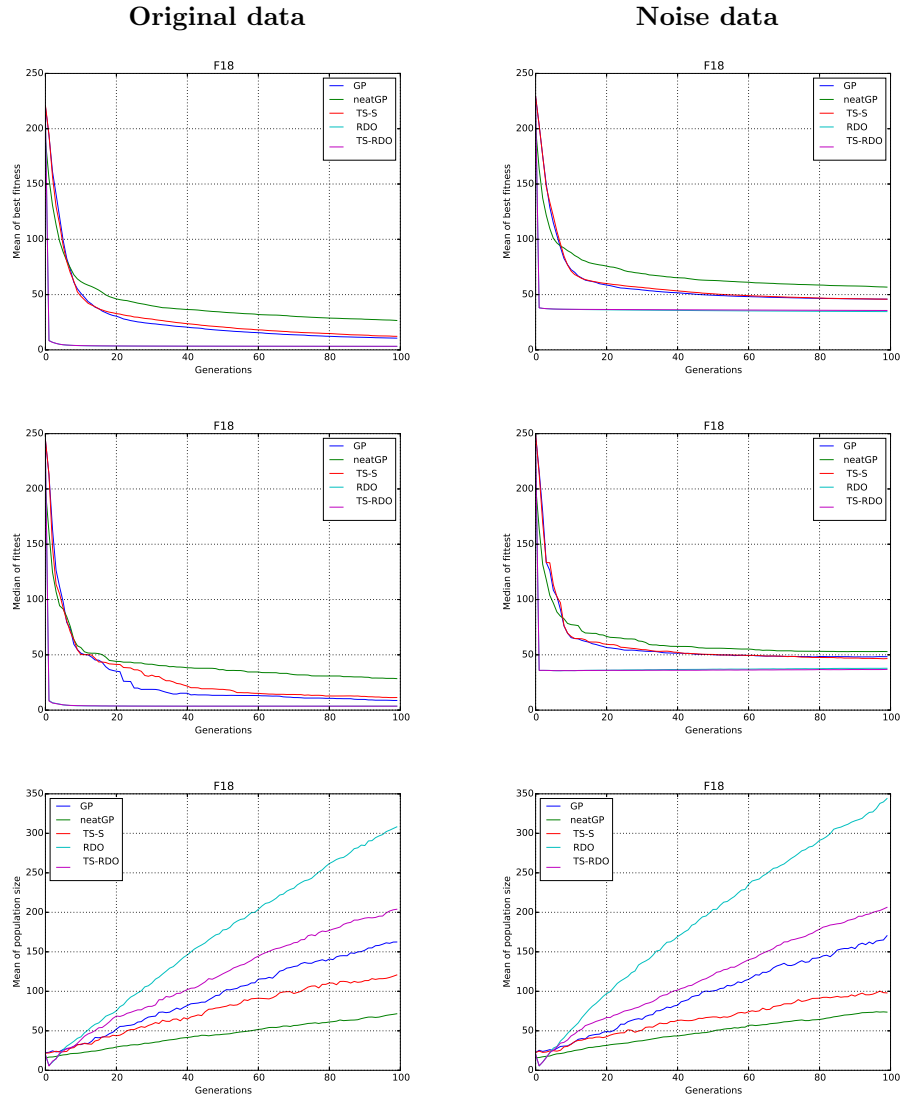

Table 20: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F19.

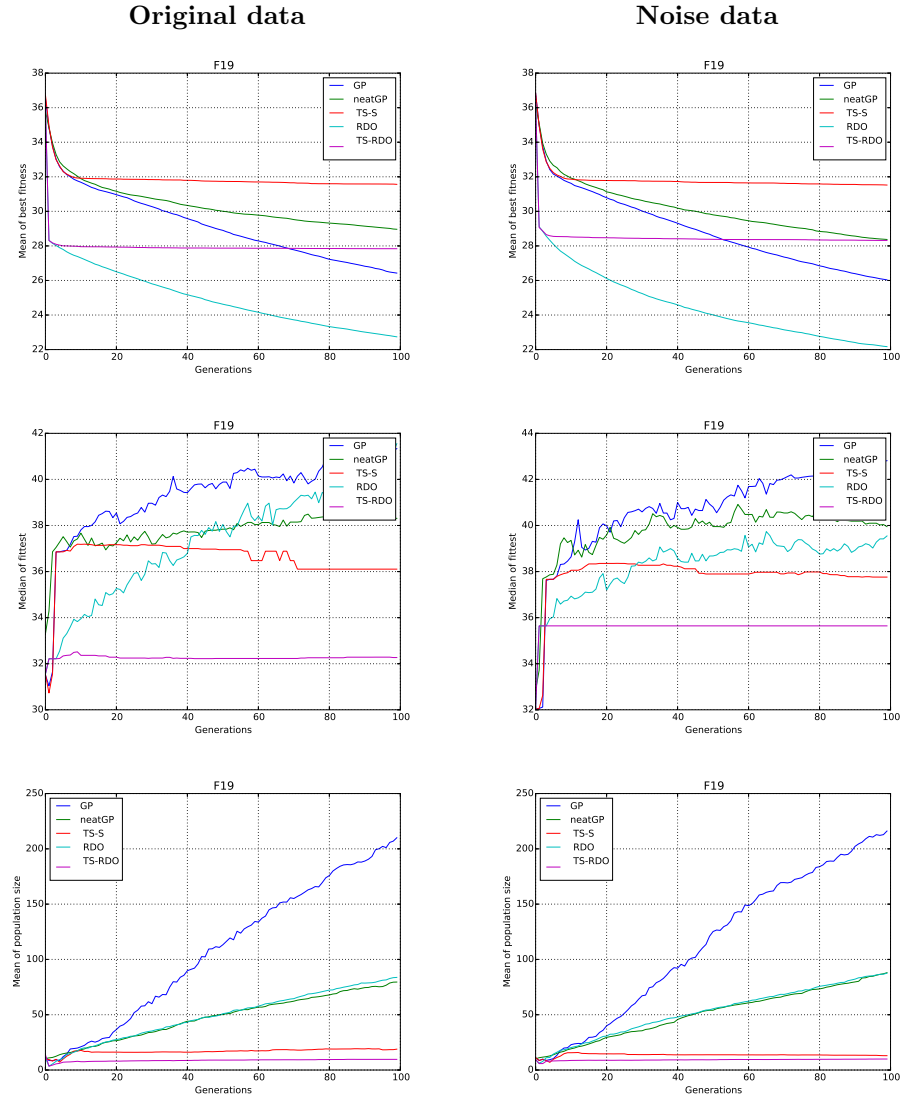

Table 21: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F20.

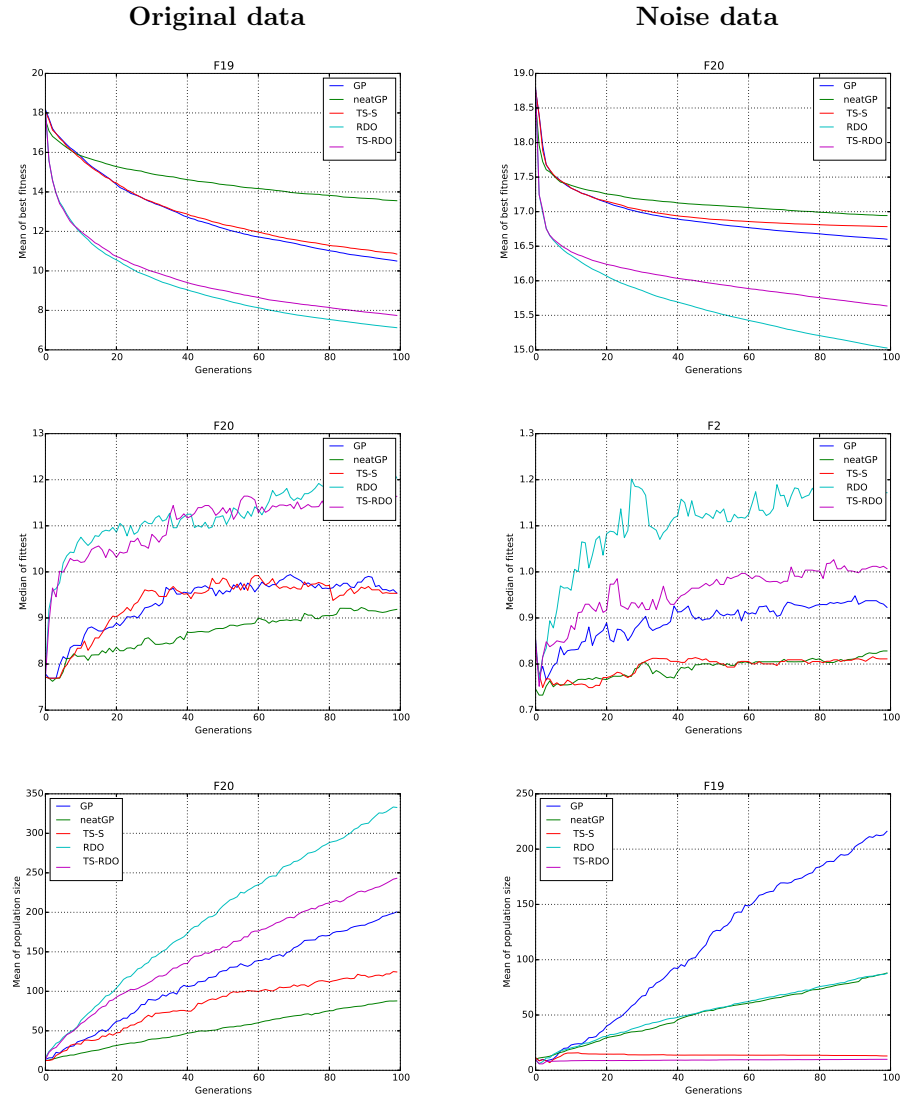

Table 22: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F21.

Table 23: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F22.

Table 24: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F23.

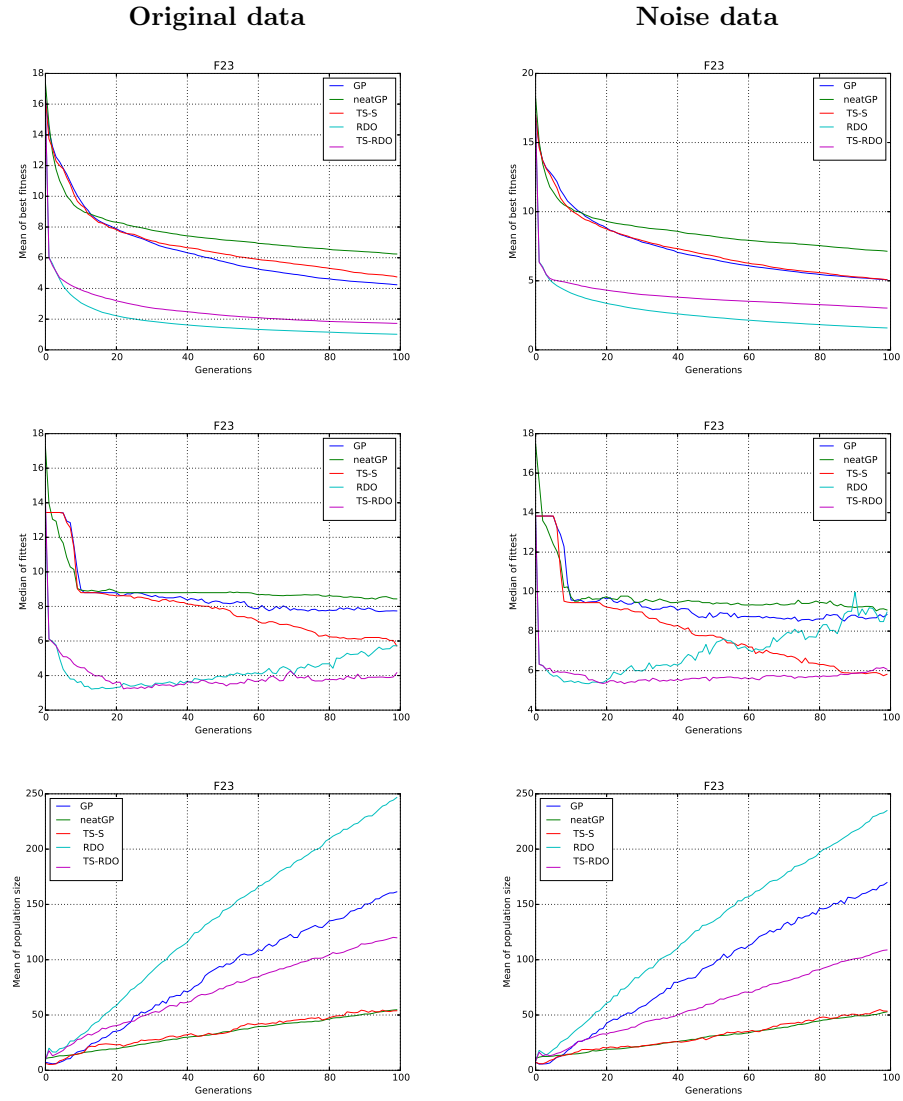

Table 25: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F24.

Table 26: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 3 of problem F25.

Table 27: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F1.

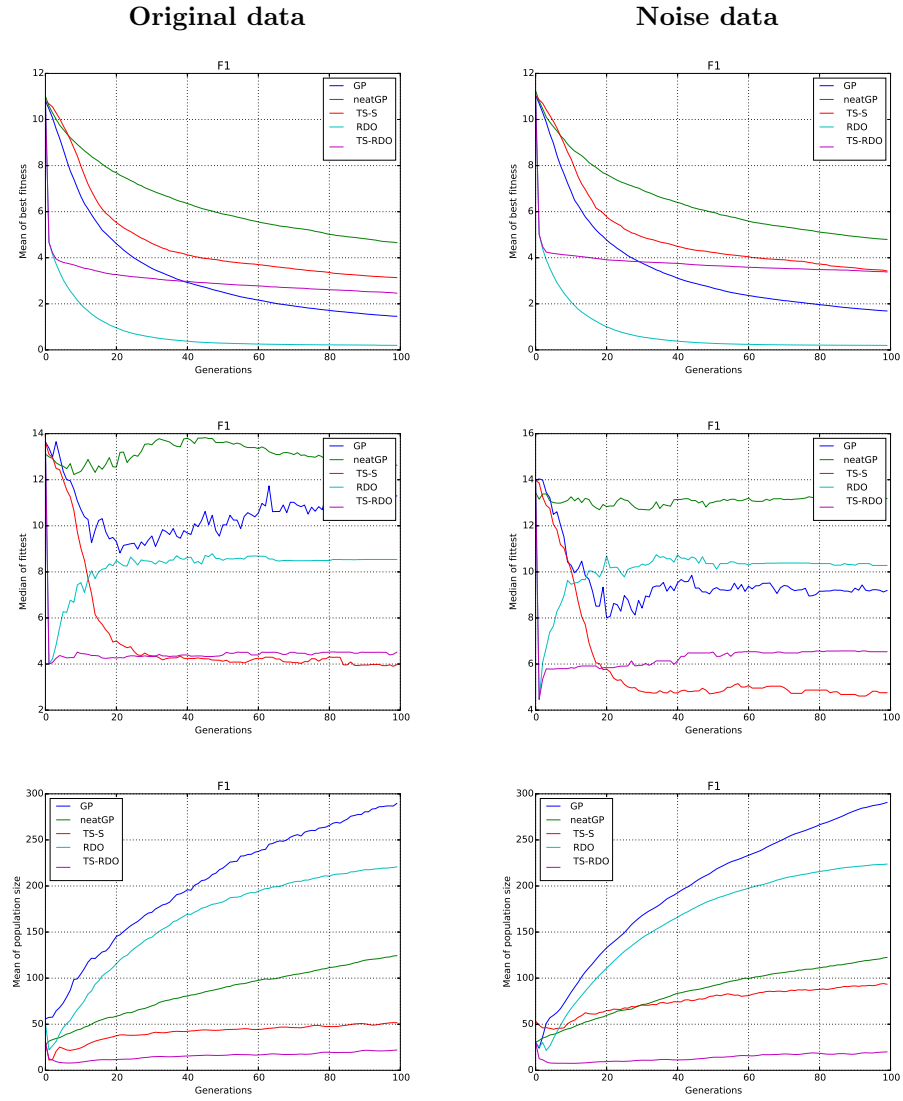

Table 28: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F2.

Table 29: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F3.

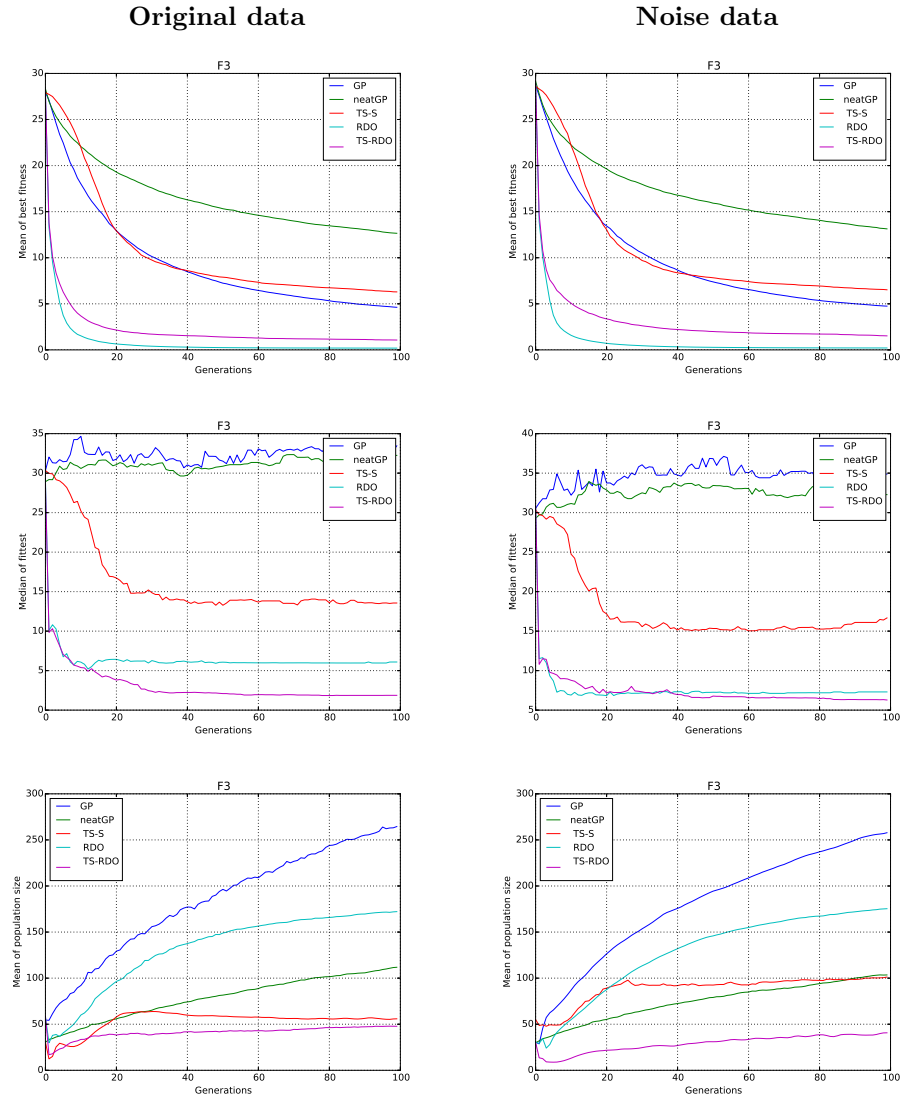

Table 30: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F4.

Table 31: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F5.

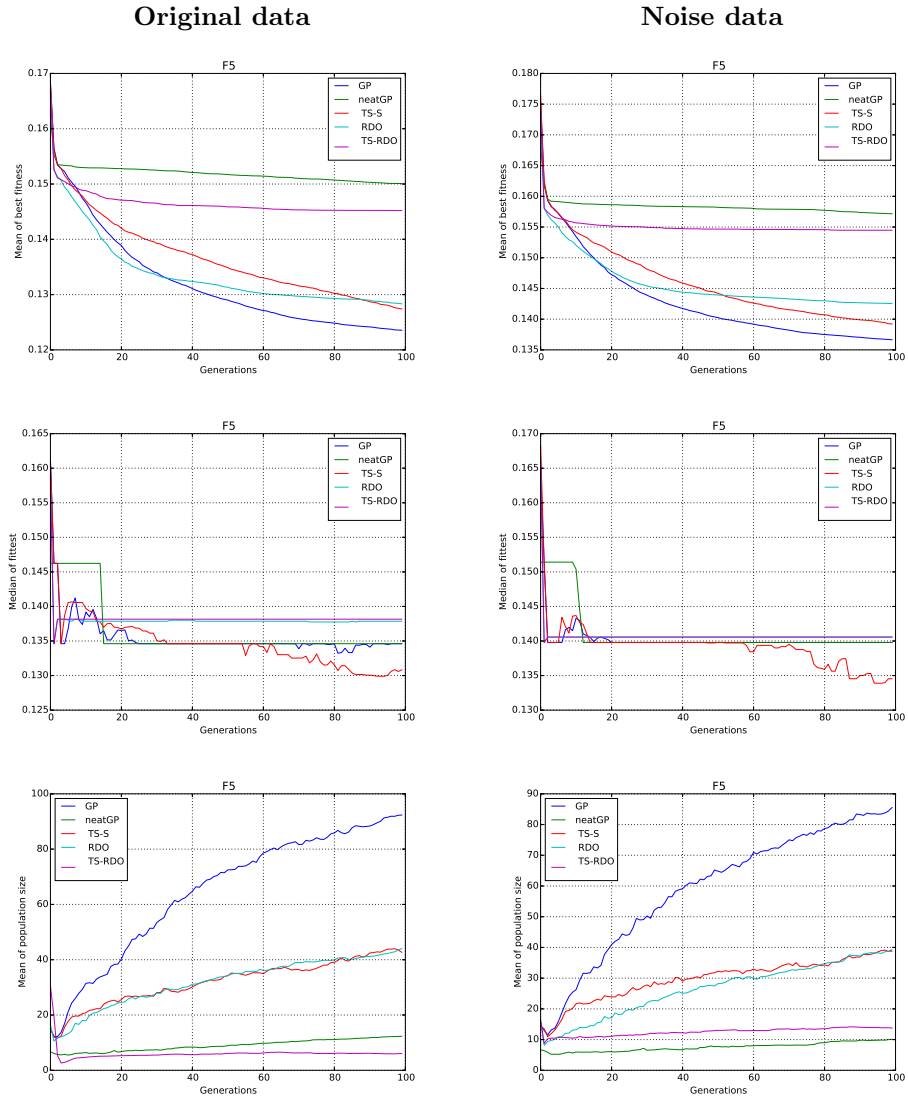

Table 32: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F6.

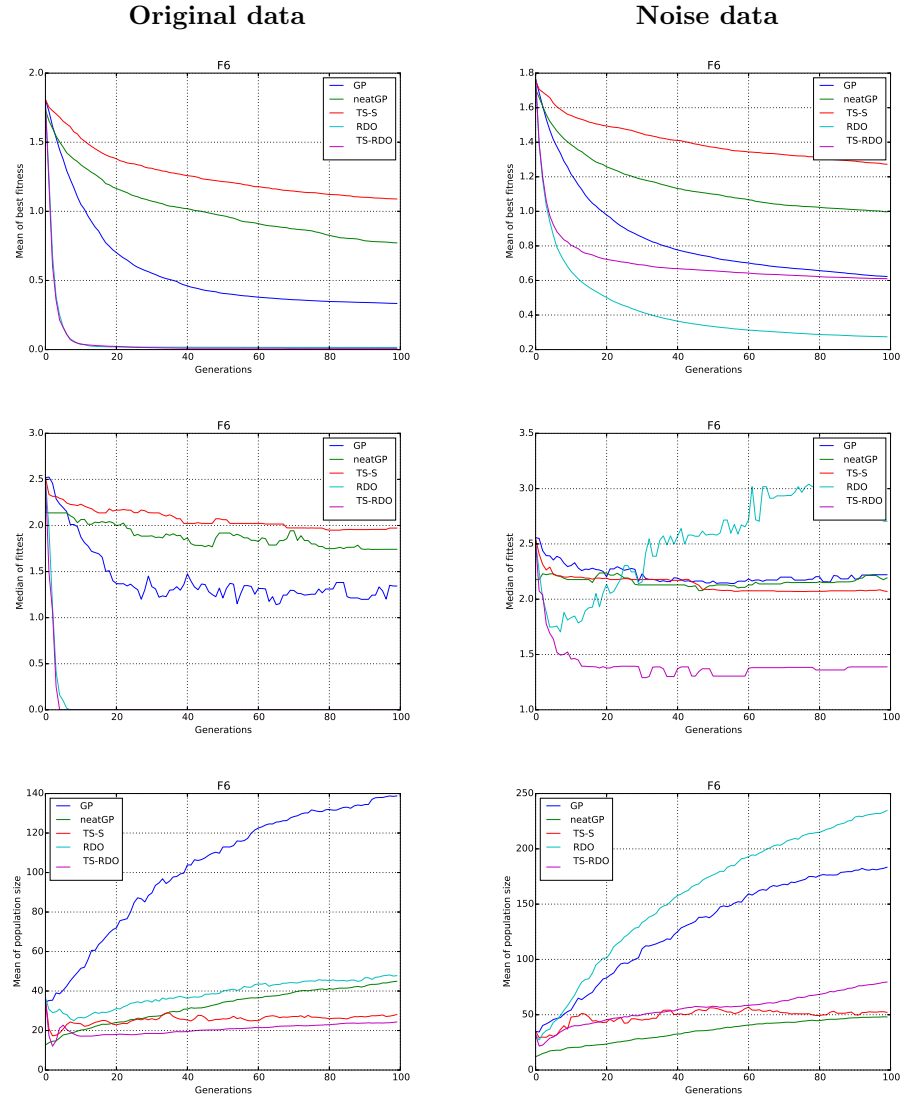

Table 33: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F7.

Table 34: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F8.

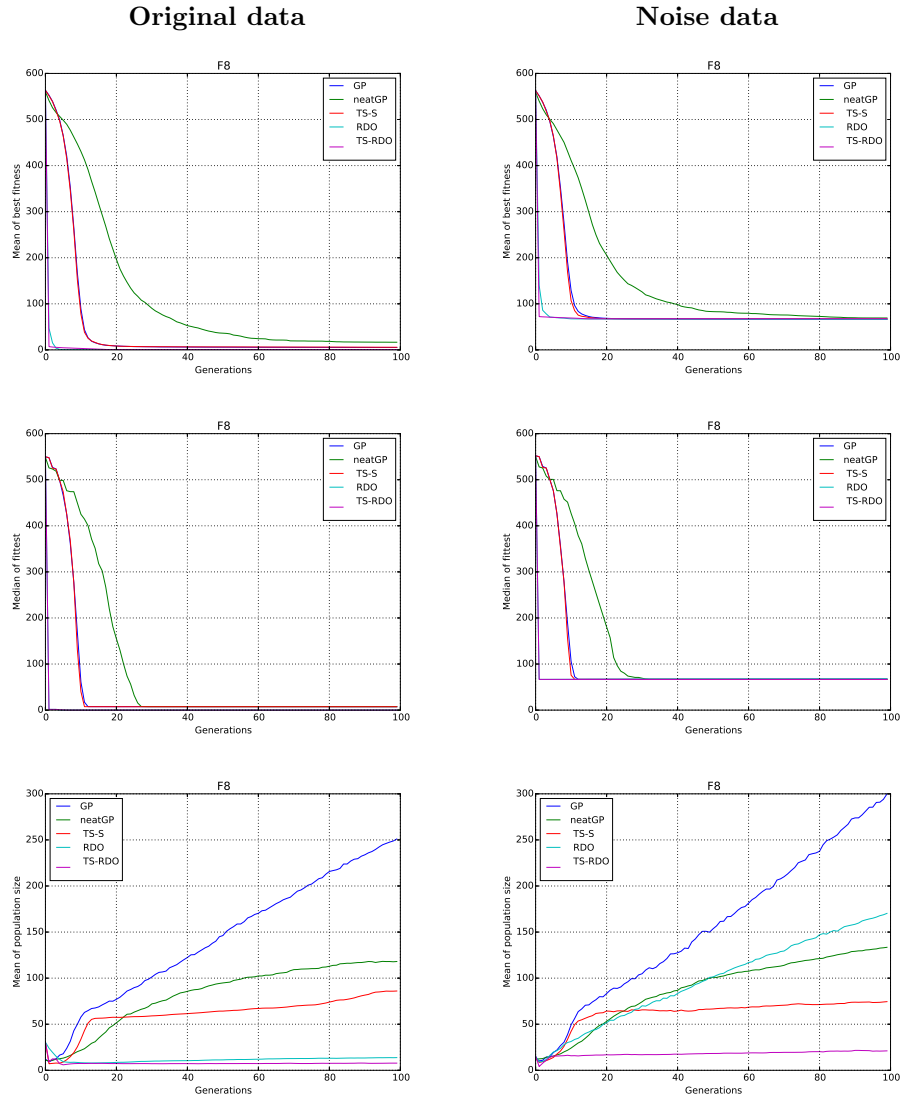

Table 35: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F9.

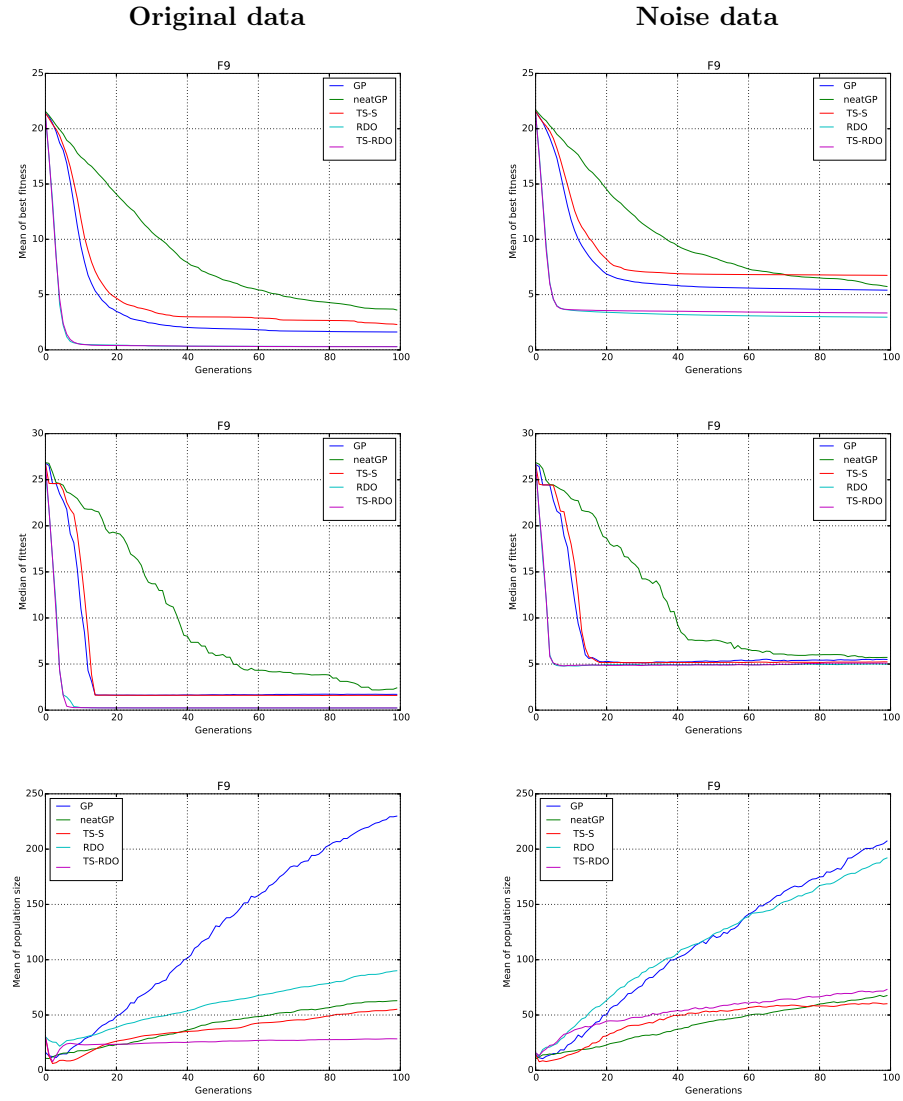

Table 36: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F10.

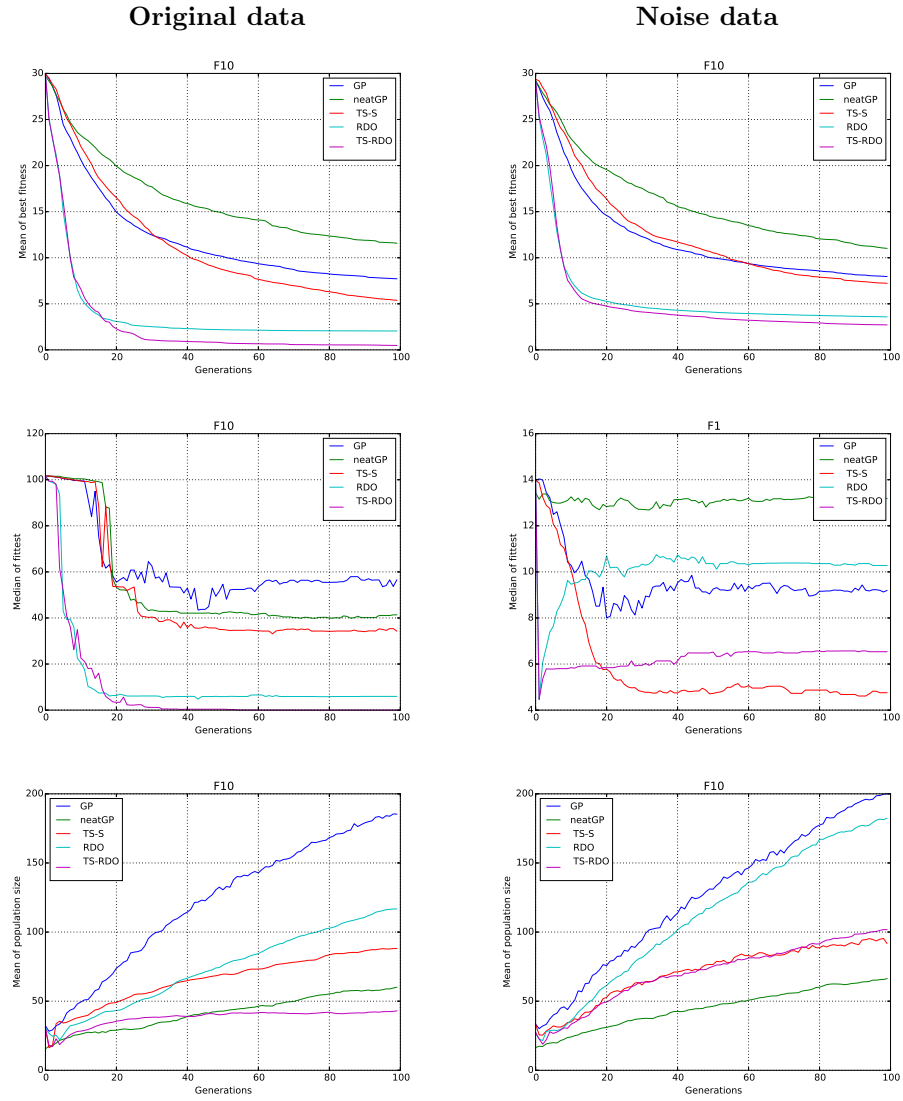

Table 37: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F11.

Table 38: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F12.

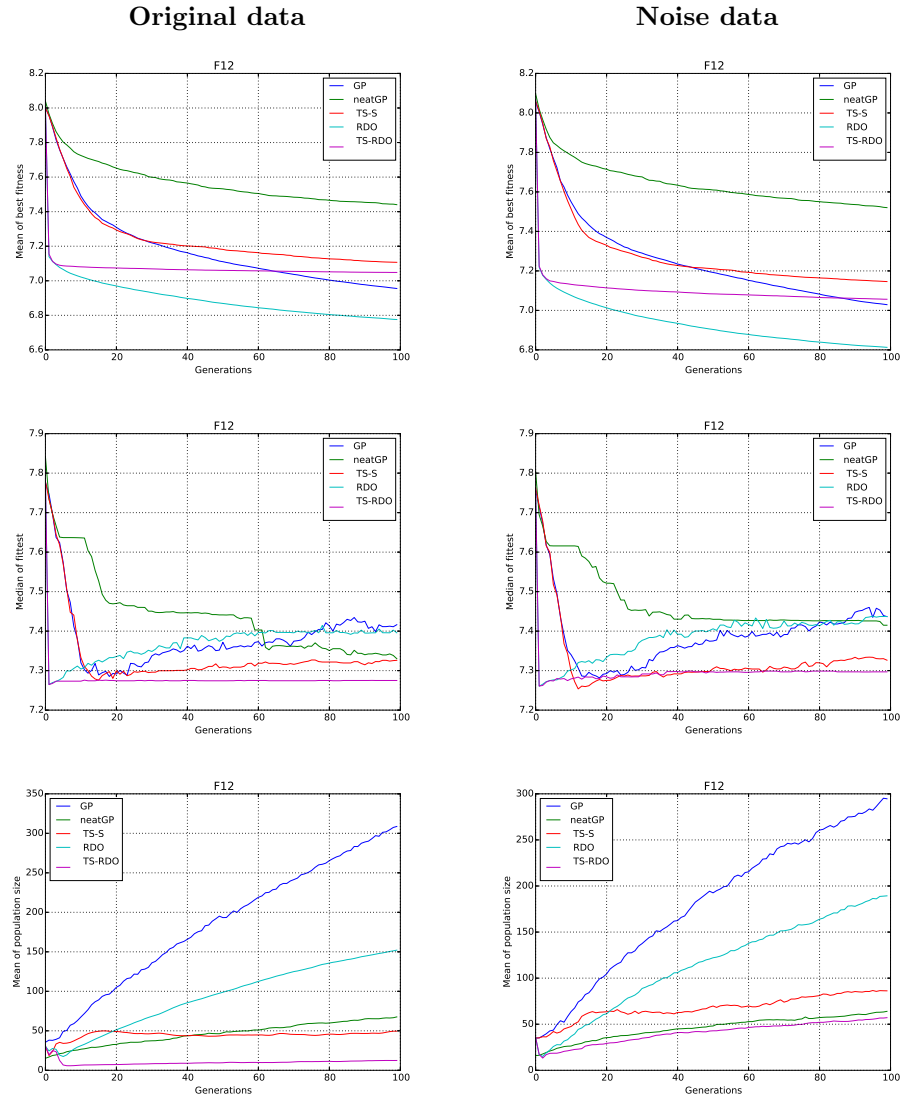

Table 39: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F13.

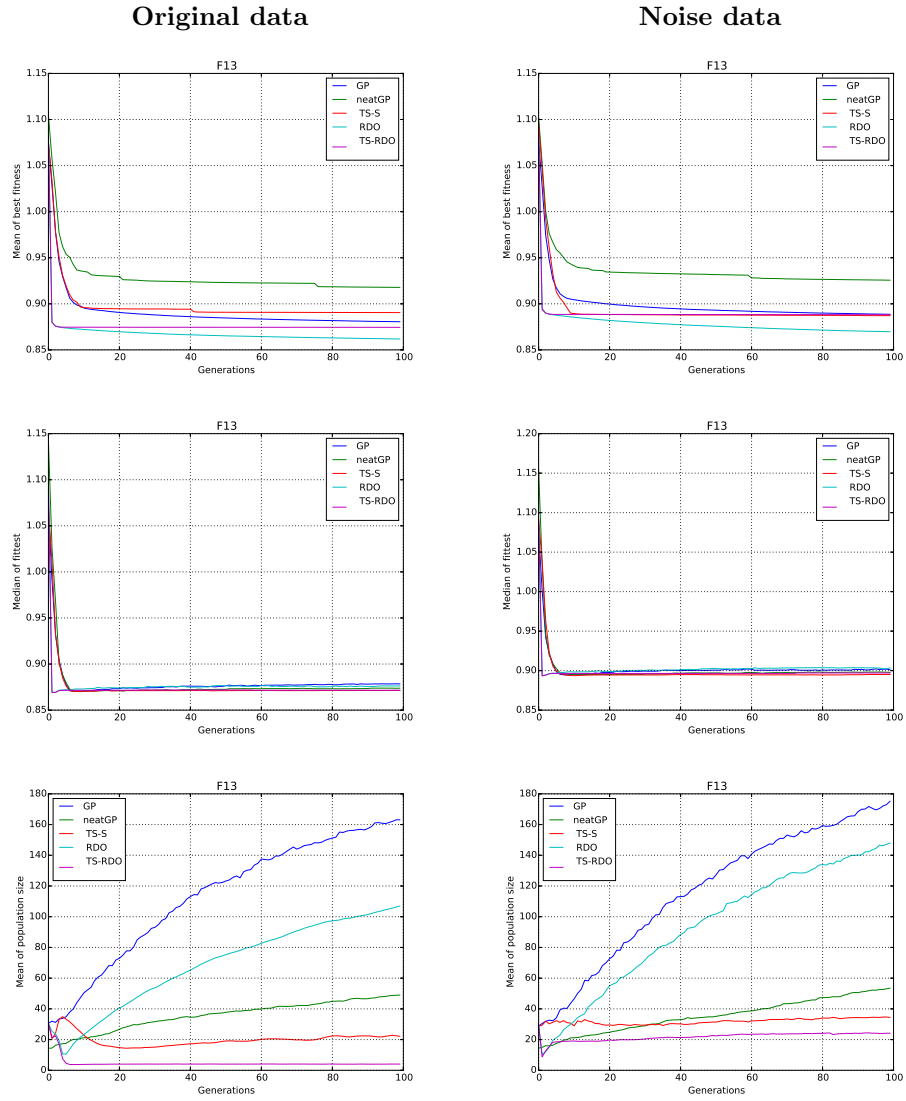

Table 40: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F14.

Table 41: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F15.

Table 42: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F16.

Table 43: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F17.

Table 44: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F18.

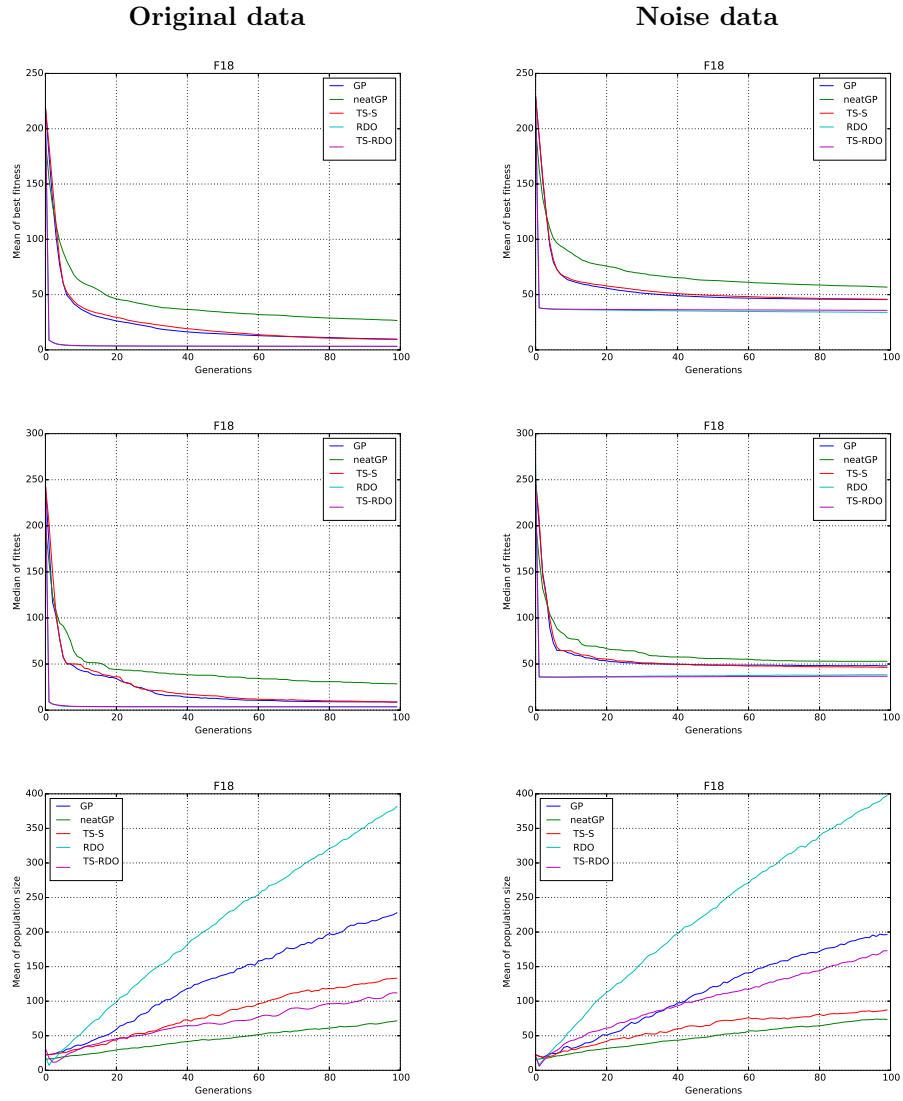

Table 45: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F1.

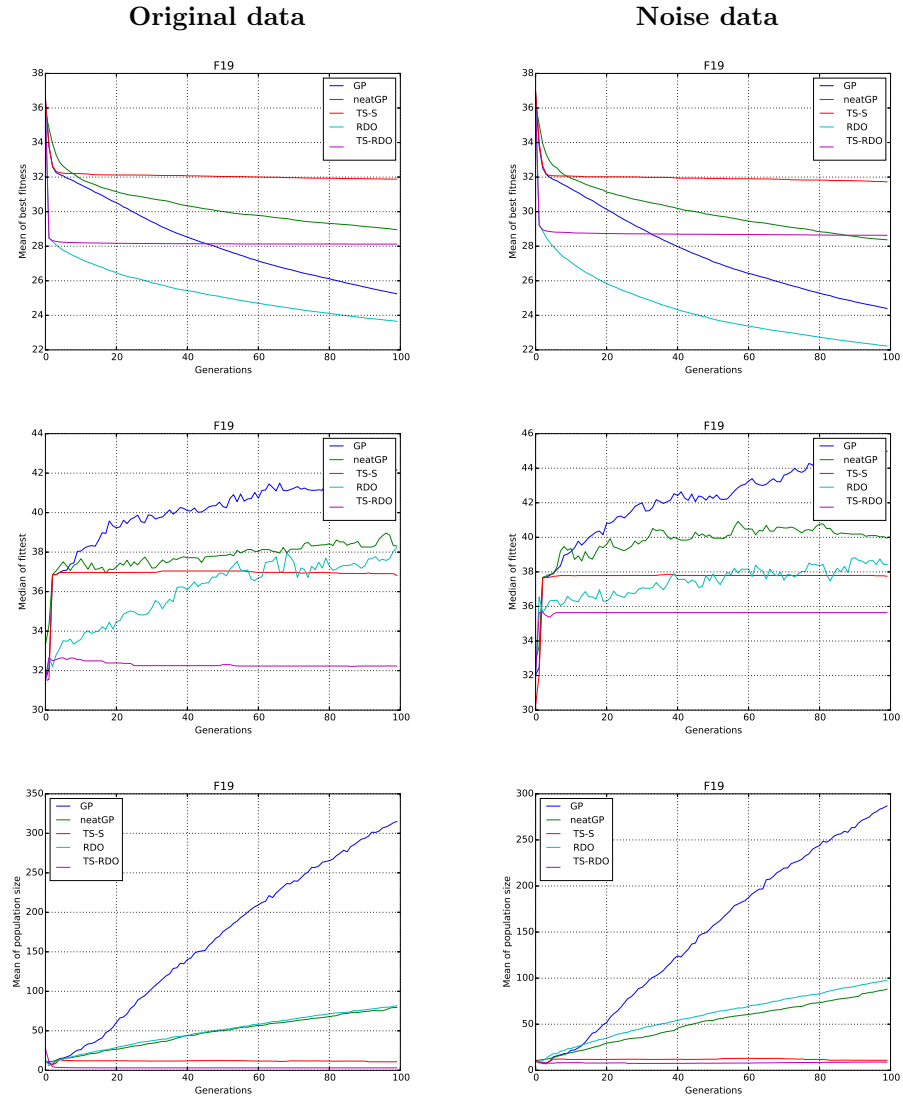

Table 46: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F20.

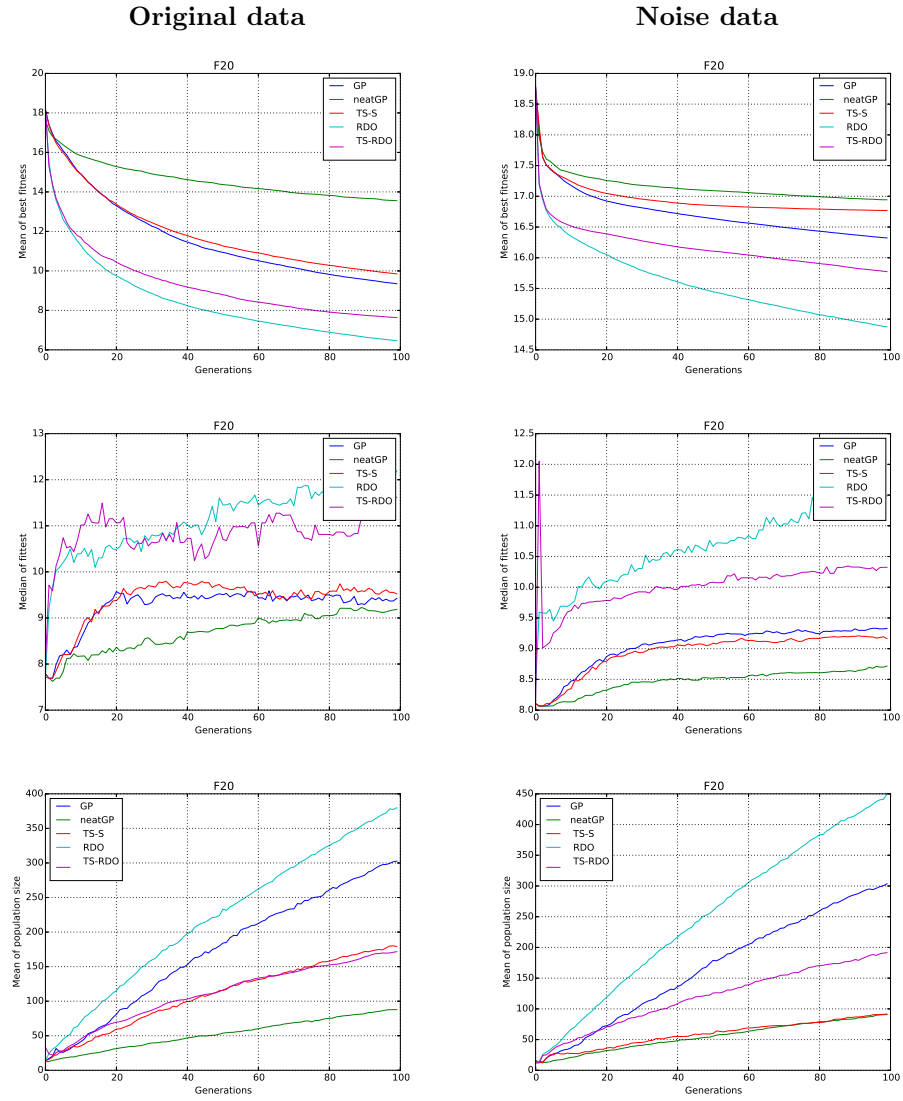

Table 47: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F21.

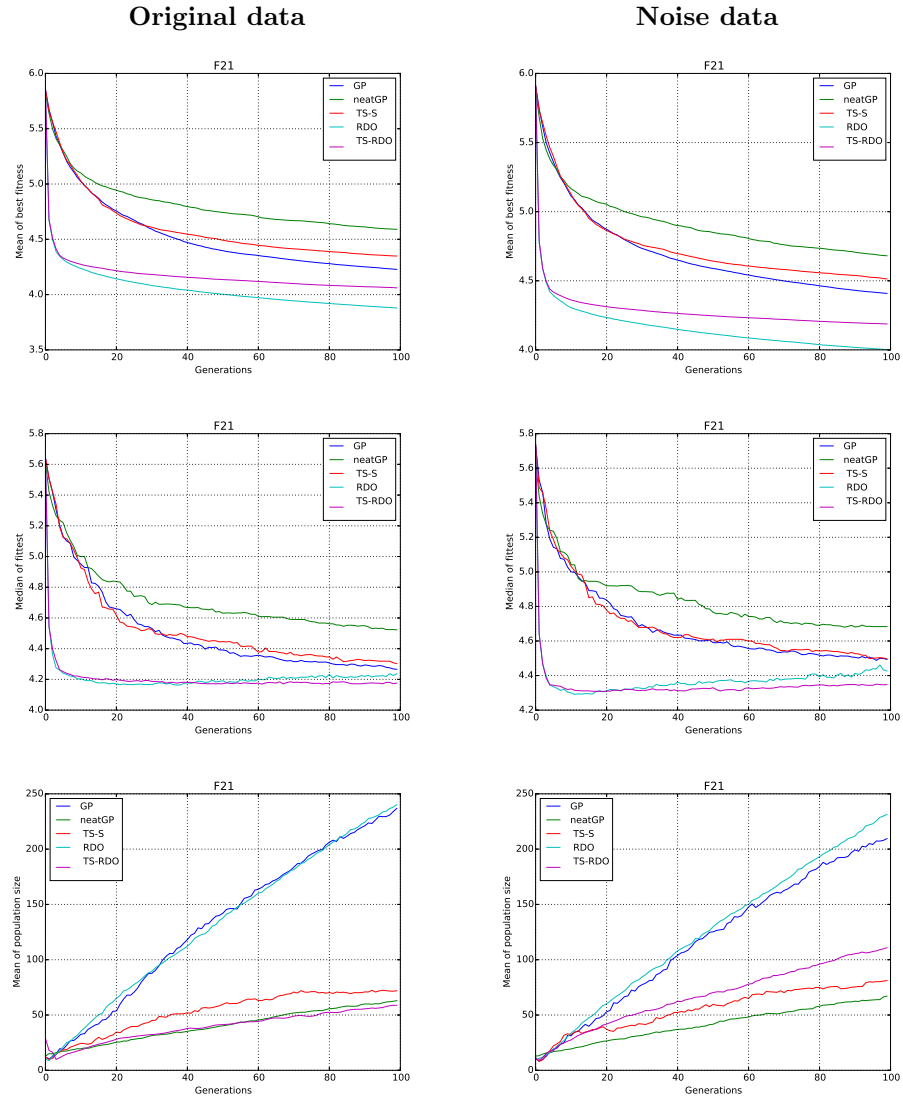

Table 48: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F22.

Table 49: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F23.

Table 50: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F24.

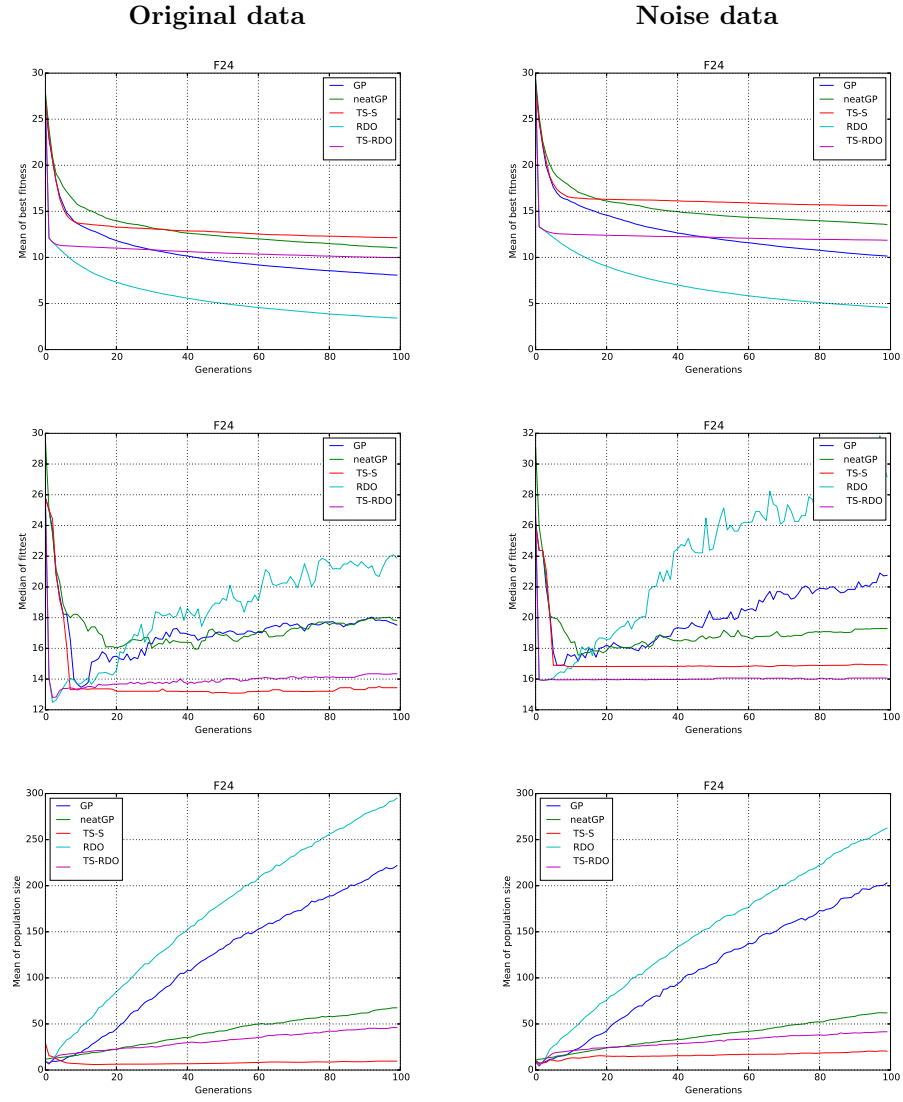

Table 51: Mean of best fitness of individuals, Median of fittest of individuals and Mean of size of individuals in the population over all generations with tournament size is 7 of problem F25.
